Thank you for choosing the SoundPoint IP 650 SIP, a full-duplex, hands-free phone. This unit provides business telephony features and functions such as multiple call appearances, call hold, transfer, and conference over an IP network.

In this User Guide, you will find everything you need to quickly use your new phone. Be sure to verify with your system administrator that your network is prepared for configuring your SoundPoint IP 650 SIP phone. As well, be sure to read the Parts List and Regulatory Notices sections in this guide before you set up and use the SoundPoint IP 650 SIP phone. This information can also be found at http://www.polycom.com/support/voip/.

Getting Started with Your SoundPoint IP 650 SIP Phone

This chapter provides basic installation instructions and information for obtaining the best performance with the SoundPoint IP 650 phone.

The SoundPoint IP 650 provides a powerful, yet flexible IP communications solution, delivering excellent voice quality. The high-resolution graphic display supplies content for call information, multiple languages, directory access, and system status. The SoundPoint IP 650 supports advanced functionality, including multiple call and flexible line appearances, HTTPS secure provisioning, presence, custom ring tones, local conferencing, and Polycom's HD Voice technology.

When equipped with up to three SoundPoint IP Expansion Modules, the SoundPoint IP 650 delivers the advanced call handling capabilities of a high-performance attendant console.

This chapter contains:
- Parts List
- Assembling Your SoundPoint IP 650 SIP Phone
- Features of Your SoundPoint IP 650 SIP Phone
- Using the Navigation Keys

To customize your phone, refer to Customizing Your SoundPoint IP 650 SIP Phone on page 1-1. To read about the phone’s basic features, refer to Using the Basic Features of Your SoundPoint IP 650 SIP Phone on page 3-1. To read the phone’s advanced features, refer to Using the Advanced Features of Your SoundPoint IP 650 SIP Phone on page 4-1. To add a SoundPoint IP Expansion Module to your SoundPoint IP 650 phone, refer to Using the SoundPoint IP Expansion Module on page 5-1.

If you require additional information or assistance with your new phone, contact your system administrator.
Parts List

The following components are included in your SoundPoint IP 650 SIP package:

- Polycom SoundPoint IP 650 SIP phone
- Handset & handset cord
- Phone Base
• Network / Power Cable

• Quick Start Guide and registration card

Check this list before installation to ensure that you have received each item. If you are missing any items, contact your system administrator.

Assembling Your SoundPoint IP 650 SIP Phone

This section describes how to assemble your SoundPoint IP 650 SIP phone:
• Connect network and power source
• Connect handset and headset (optional)
• Attach phone base

If your phone is already assembled, go directly to Features of Your SoundPoint IP 650 SIP Phone on page 1-9.

Connecting Network and Power Source

You have two options for network and power source connections. Your system administrator will advise you on which one to use.

You can use one of the following methods:
• AC power
• Power over Ethernet (PoE)
AC Power

To connect the AC power:

1. Connect the supplied network cable between the LAN jack on the phone and the LAN port on the wall or hub/switch device port.

2. Connect the DC plug on the power adapter to the DC 24V jack marked on the phone.

3. Connect the country-specific AC cord to the power adapter.

Power over Ethernet

Using a regular CAT5 cable (optional accessory from Polycom), the phone can be powered from a PoE (IEEE 802.3af) compliant switch or hub.
To connect the PoE:

- Plug the supplied network cable between the LAN jack on the phone and an available power and data port on the in-line power switch.

Connecting the Handset and Optional Headset

To connect the handset and optional headset:

1. Connect the short straight end of the phone cord to the handset and the corresponding longer straight end of the cord to the handset jack on the back of the phone.
2. Connect the headset (optional) to the headset jack on the back of the phone.

For information on supported headsets, go to www.polycom.com/support/voice and enter the string “Headset Compatibility List” in the Knowledge Base text box.

**Attaching the Base**

The phone base can be attached to the SoundPoint IP 650 in one of two ways:

- As a desk mount
- As a wall mount
To attach the base as a desk mount:

1. Place all cords in the recessed area above the modular jacks.

2. Align the two protrusions on the bracket with their corresponding holes in the phone.

3. Snap them together to lock the base to the phone.
To attach the base as a wall mount:

1. Place all cords in the recessed area above the modular jacks.

2. On the back of the phone, remove the key located behind the hook switch and reposition it so that the end tab (at a 45° angle) is facing up.

3. With mounting tab of the base unit facing up, fasten the base unit to the wall mount using wall anchors (not included).

**Note**

The wall mount is not included in SoundPoint IP 650 SIP package. Contact your system administrator if you require one.
The features of your SoundPoint IP 650 phone are:

1. **Message Waiting Indicator** — This will alert you to voice and text (instant) messages.

2. **Display Control Keys** — Use \( \uparrow \), \( \downarrow \), \( \leftarrow \), and \( \rightarrow \) (arrow keys) to scroll through the displayed information.

   Use \( \square \) to select a field of displayed data.

   Use \( \times \) to delete displayed data.

3. **Feature Keys** — Access important features using these keys.

   - **Directories** — Access to local directories and call lists.

   - **Applications** — Access to special applications (contact system administrator).

   - **Conference** — Allows setup of a local conference.
1. **Transfer** — Transfer of current call to third party.

2. **Redial** — Dials most recently dialed party.

3. **Menu** — Access local (your phone) and global (your organization) features.

4. **Messages** — Access and manage text and voice messages.

5. **Do Not Disturb** — Cancels ringing and directs incoming calls to your Voice Mail (if supported).

4. **Microphone Mute** — Mutes audio transmission locally during calls and conferences.

5. **Headset** — Allows you to place and receive calls through an optionally connected headset.

6. **Hands-free Microphone** — Picks up audio during hands-free calls. Place your phone on a hard, flat surface for best results.

7. **Speakerphone** — Allows for hands-free communication during calls.

8. **Volume Keys** — Use these to adjust the volume of the handset, headset, speaker, and ringer.

9. **Dial Pad** — These 12 keys provide the 10 digits, the alphabetic characters, and special characters available in context-sensitive applications.

10. **Soft Keys** — These keys are automatically labeled to identify their context-sensitive functions.

11. **Hold** — Holds an active call or resumes a held call.

12. **Speaker** — For ringer and hands-free audio output.

13. **Hookswitch**

14. **Line/Speed Dial Key** — Use these keys to activate up to six lines or speed dials that can be assigned to your phone.
15. **Line Indicators**—Individual multi-color LEDs display the dynamic call state and remote user status (busy lamp field (BLF) and presence). The mapping is:

- Solid green—An active call is in progress.
- Fast flashing green—There is an Incoming (ringing) call.
- Flashing green—The call is held by the other party.
- Flashing red—The call is on hold.
- Solid red—The line is busy remotely (shared lines).

16. **Line Keys**—Use these keys to activate up to six lines or speed dials that can be assigned to your phone. The associated icons represent:

- Registered line  
- Registered shared line  
- Unregistered line  
- VoiceMail/Messages  
- Speed-Dial  
- Ringing  
- Call if progress with HD Voice  
- Call Forward  
- Do Not Disturb  
- Conference  
- Presence/BLF
17. **Graphic Display** — Shows information about calls, messages, soft keys, time, date, and other relevant data.

   - Caller display information — first party, second party, number of calls
   - Information display line (in order of precedence highest to lowest)

     - Popup text (like network errors)
     - Do Not Disturb text
     - Missed call text or second incoming caller display
     - Prompt text (like “Enter number”)
     - Time and date text (if idle display is not used for time/date display)

---

**Using the Navigation Keys**

To navigate through menus and to enter data, these are useful tips:

- Use ▲ and ▼ to scroll through the lists.

**Note** Press the * key to page up. Press the # key to page down. These shortcuts can be used when lists appear on more than one page.

- When menus have submenus, use the ◄ and ► to move one level down and one level up.

- Press Menu to exit from any menu.

- Press Directories to exit from any directory.

- To enter text using the dial pad, press the number keys one or more times. For example, for ‘A’ press ‘2’ and for ‘C’ press ‘222’. When in text entry mode, the title will show whether keys will generate numbers (1), upper-case (A), or lower-case (a) characters and the 1/A/a soft key can change this.
Customizing Your SoundPoint IP 650 SIP Phone

You can customize your SoundPoint IP 650 phone by adjusting the setting for time and date, display contrast, and ring type, for example. You can add contacts to the phone’s directory manually or from call lists. You can handle incoming calls from different contacts in different ways.

This chapter provides basic operating instructions for customizing your SoundPoint IP 650 SIP phone. This chapter contains instructions on:

- Configuring Basic Settings
- Managing Call Lists
- Managing Contacts
- Managing Incoming Calls

Some customizations of your SoundPoint IP 650 SIP phone are performed by your system administrator. These include:

- Supporting Multiple Lines
- Supporting Multiple Line Keys Per Line
- Supporting Shared Lines

To read about the phone’s basic features, refer to Using the Basic Features of Your SoundPoint IP 650 SIP Phone on page 3-1. To read about the phone’s advanced features, refer to Using the Advanced Features of Your SoundPoint IP 650 SIP Phone on page 4-1. To add a SoundPoint IP Expansion Module to your SoundPoint IP 650 phone, refer to Using the SoundPoint IP Expansion Module on page 5-1.

If you require additional information or assistance with your new phone, contact your system administrator.
Configuring Basic Settings

You can configure the following basic settings through use of the Menu:

- The appearance of the time and date
- Display contrast
- Backlight intensity
- Headset Memory Mode
- Ring type
- Language support (localization)

You can mute the microphone and adjust the volume using separate keys.

Appearance of Time and Date

The time and date appears on the graphic display of the SoundPoint IP 650 phone. If the phone cannot obtain a time and date from the call server, the display will flash. Contact your system administrator if either the time or date is incorrect.

You have control over the format of the time and date display and can turn the display of time and date off. The default time and date format appears in the following figure.

To configure the time and date:

1. Press Menu.
2. Select Settings > Basic > Preferences > Time & Date.
3. Select from Clock Date, Clock Time, Clock Order, or Enable/Disable.
4. Scroll through the options under each of these selections using the ▲ and ▼.

5. Press the Select soft key to confirm your choice.

6. Press Menu or the Exit soft key repeatedly to return to the idle display.

Display Contrast

Note If you want to change the display contrast on the SoundPoint IP Expansion Module, refer to Adjusting the Display Contrast on page 5-5.

To adjust the contrast on the display to a comfortable level:

1. Press Menu.

2. Select Settings > Basic > Contrast.

3. Press the Up or Down soft keys to increase or decrease the display contrast.

Note You can also use the volume keys to increase or decrease the diplay contrast.
4. Press the **Ok** or **Cancel** soft keys to accept or cancel changes.

5. Press **Menu** or the **Exit** soft key repeatedly to return to the idle display.

### Backlight Intensity

Backlight intensity on the SoundPoint IP 650 phone has three modes:

- Backlight On
- Backlight Idle
- Dim

You can modify the Backlight On intensity and the Backlight Idle intensity separately. You can select high, medium, low, and off levels for both.

Dim mode intensity is determined by the Backlight On intensity and the Backlight Idle intensity together as follows:

<table>
<thead>
<tr>
<th>Backlight On Intensity</th>
<th>Backlight Idle Intensity</th>
<th>Dim Intensity</th>
</tr>
</thead>
<tbody>
<tr>
<td>off</td>
<td>off</td>
<td>off</td>
</tr>
<tr>
<td>low</td>
<td>dimmer than low</td>
<td>low</td>
</tr>
<tr>
<td>medium</td>
<td>dimmer than medium</td>
<td>medium</td>
</tr>
<tr>
<td>high</td>
<td>off</td>
<td>medium</td>
</tr>
<tr>
<td>high</td>
<td>low</td>
<td>medium</td>
</tr>
<tr>
<td>high</td>
<td>medium</td>
<td>medium</td>
</tr>
<tr>
<td>high</td>
<td>high</td>
<td>high</td>
</tr>
</tbody>
</table>

The Backlight On mode turns on for following events:

- Any key press
- Hookswitch release
- Incoming calls
- Ending a call, holding a call, resuming a call by the other party
- A voice or instant message received
- A USB device plugged in or unplugged

If you do not press any keys on the phone, after 20 seconds of the backlight turning on, the backlight dims (or changes) to medium in the following cases:

- A call is in progress
- A call is on hold
- There is an incoming call (ringing)
- There is an outgoing call (ringing back)
- Any menu shows on the display

In all other cases, the mode changes to Backlight Idle.

To modify the backlight intensity:

1. Press 

2. Select Settings > Basic > Backlight Intensity.

3. Select Backlight On Intensity.

4. Use the or to select high, medium, low, or off and press the Select soft key to modify the Backlight On Intensity.

The default level is medium.
5. Select Backlight Idle Intensity.

6. Use the ▲ or ▼ to select high, medium, low, or off and press the Select soft key to modify the Backlight On Intensity. The default level is low.

**Headset Memory Mode**

This feature is especially useful for permanent or full-time headset users.

**To permanently enable the Headset Memory Mode:**

1. Press Menu.
2. Select Settings > Basic > Preferences > Headset Memory.
3. Use the ▲ or ▼ to select Enabled and press the Select soft key to enable Headset Memory Mode.

4. Press Menu or the Exit soft key repeatedly to return to the idle display.

Repeat steps 1 to 4 to select Disabled and turn Headset Memory Mode off.
To activate Headset Memory Mode:

Press \[\text{ }\] twice.

The flashing headset icon on the graphic display or a flashing headset key indicates that the headset mode is activated. Pressing \[\text{ }\] or Answer soft key to receive a call will now connect to your headset automatically.

Ring Type

You can select from the different ring types to distinguish between lines or to have a different ring from your neighbor’s phone. You can set distinctive incoming ringing tones for contacts in your local directory.

To change the incoming ring to a desired sound:

1. Press \[\text{ }\].
2. Select Settings > Basic > Ring Type.
3. (Optional) If multiple lines are configured on your phone, first select the line to change from the list using the \[\text{ }\] and \[\text{ }\].
4. Using the \[\text{ }\] and \[\text{ }\], select the desired ring type. Press the Play soft key to hear the selected ring type.

5. Press the Select soft key to change to the selected ring type.

6. Press \[\text{ }\] or the Exit soft key repeatedly to return to the idle display.

Note

If you configure your SoundPoint IP 650 phone for silent ring, press the ringing Line key or the Answer soft key to answer the call. If your handset is off hook, the call is routed to the handset. If your handset is on hook, the call is routed to the speaker.
Language Support

Many languages are supported by the SoundPoint IP 650 phone.

To change the language:

1. Press Menu .
2. Select Settings > Basic > Preferences > Language.
3. Scroll through the list of available languages.
4. Press the Select soft key when the desired language is highlighted.
   Text that appears on the graphic display will change to the language of your choice.
5. Press Menu or the Exit soft key repeatedly to return to the idle display.

Muting the Microphone

During a call, press . The Message Waiting Indicator turns red and a microphone on the graphic display indicates that the other party (or parties) cannot hear you.

Microphone Mute applies to all modes: Handset, Headset, and Hands-free Speakerphone. You can still hear all other parties while mute is enabled.

To turn off Microphone Mute, press again.
Customizing Your SoundPoint IP 650 SIP Phone

Adjusting the Volume

Press \[ \text{volume up} \] to adjust receiver volume during a call. Pressing these keys in the idle state adjusts the ringer volume.

Note

To conform to regulatory requirements, handset and headset volume will return to a preset level after each call, but the configuration can be changed by your system administrator. Hands-free Speakerphone volume settings will be maintained across calls.

Managing Call Lists

Local lists of missed, received, and placed calls is maintained by the phone (up to 100 for each list).

Press \[ \text{Directories} \] followed by Call Lists > Missed Calls, Received Calls, or Placed Calls as desired. The Placed Call list appears in the following figure.

![Placed Calls]

To manage the listed calls:
- Select the Edit soft key to edit the dial string if necessary.
- Select the Dial soft key to return the call.
- Select the Exit soft key to return to the previous menu.

For additional choices, press the More soft key followed by:
- The Info soft key to view information about the call.
- The Save soft key to store the contact to the Contact Directory.
- The Clear soft key to delete the call from list.

Press the More and Exit soft keys repeatedly to return to the idle display.
Managing Contacts

You can store a large number of contacts in your phone's directory. Contact your system administrator for the exact number.

You can add, edit, delete, dial, or search for a contact in this directory.

Adding Contacts

You can add a contact manually or from a call list.

Adding Contacts Manually

To add a contact manually:

1. Press .
2. Select Contact Directory.
3. Press the More soft key.
4. Press the Add soft key.

Note

Press the Right arrow key from the idle display to access the Placed Calls list. Press the Left arrow key from the idle display to access the Received Calls list. Press the Down arrow from the idle display to access the Missed Calls list. These shortcuts can be used while placing calls or performing transferring and conferencing functions.

Note

You can manually clear the call lists. They are automatically cleared when you restart the phone.
5. Enter first and/or last name of the contact from the keypad.
   Use the 1/A/a soft key to select between numeric and upper/lower case alphanumeric modes.
   Use the Encoding soft key to access special characters in other languages.

6. Enter a contact number.
   This is a required field and it must be unique (not already in the directory).

7. Change the Speed Dial Index if desired.
   It is automatically assigned to the next available index value.
   For more information, refer to Assigning Speed Dial Keys on page 3-17.

8. Change the Ring Type and Divert Contact if desired.
   These fields may be left blank.
   For more information on setting the Ring Type field, refer to Distinguishing Calls on page 2-15.
   For more information on diverting contacts, refer to Diverting Calls on page 2-16.

9. Change the Auto Reject, Auto Divert, Watch Buddy, and Block Buddy if desired.
   Use ← and → to switch between Enabled and Disabled settings.
   For more information on setting the Auto Reject field, refer to Rejecting Calls on page 2-16.

10. Press the Save or Cancel soft keys to accept or cancel changes.
11. Press the Exit soft key repeatedly to return to the idle display.

Adding Contacts From Call Lists

To add a contact from a call list:

1. Do one of the following steps:
   a. Press the Directories soft key.
      Select Call Lists > Missed Calls, Received Calls, or Placed Calls as desired.
   b. Press the up, down, or right arrow keys to access the desired call list.
2. Use the up and down arrow keys to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
3. Press the More soft key, and then the Save soft key to save the contact in the phone's directory.

4. Press the Directories soft key or the Exit soft key repeatedly to return to the idle display.

Note: At this point, you may want to go to the Contact Directory, check whether the contact was saved correctly, and add missing fields.

Editing Contacts

To edit a contact:

1. Press the Directories soft key.
2. Select Contact Directory.
3. Use ▲ and ▼ to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
4. Press the Edit soft key
5. Make the desired changes.

![Edit Contact (A/Ascii)](image)

6. Press the Save or Cancel soft keys to accept or cancel changes.

7. Press the Directories or the Exit soft key repeatedly to return to the idle display.

**Note**
You can also edit a contact associated with a speed dial key by pressing and holding that speed dial key and then following the steps 5 to 7 above.

**Deleting Contacts**

**To delete a contact:**

1. Press Directories.
2. Select Contact Directory.
3. Use ▲ and ▼ to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
4. Press the More soft key twice, and then the Delete soft key.
   The contact is deleted from the directory.
5. Press the Directories or the Exit soft key repeatedly to return to the idle display.
Placing a Call to a Contact

To place a call to a contact:

1. Press the Directories soft key.
2. Select Contact Directory.
3. Use ▲ and ▼ to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
4. Press the Dial soft key.

Searching For a Contact

To search for a particular contact:

1. Press Directories .
2. Select Contact Directory.
3. Press the More soft key, and then the Search soft key.
4. Using the dial pad, enter the first few characters of the contact’s first or last names.
5. Press the Search soft key again to search the contacts.
   You can dial any successful matches from the resulting information on the graphic display.
Managing Incoming Calls

You can distinguish incoming calls from contacts in your directory by setting up distinctive rings, sending them directly to your voice mail, or by transferring them directly to another party.

Distinguishing Calls

You can customize your phone so that you can distinguish different parties by ring type.

To set a distinctive ring type for a particular contact:

1. Press \( \text{Directories} \).
2. Select Contact Directory.
3. Use \( \uparrow \) and \( \downarrow \) to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
4. Press the Edit soft key and scroll down to the Ring Type field.
5. Enter the number corresponding to one of the ring types available.
   For more information, refer to Ring Type on page 2-7.
6. (Optional) To remove an existing value, press \( \Box \) followed by \( \Box \).
7. Press the Save or Cancel soft keys to accept or cancel changes.
8. Press \( \text{Directories} \) or the Exit soft key repeatedly to return to the idle display.

Note: This feature is local to the phone, and may be over-written by your organization’s settings. For more information, contact your system administrator.
Rejecting Calls

You can customize your phone so that incoming calls from a particular party are immediately sent to your voice mail.

Note
Rejecting calls is not available on shared lines.

To send incoming calls from a particular contact directly to voice mail:

1. Press .
2. Select Contact Directory.
3. Use and to scroll through the list to find the contact. You can also use the * key to Page Up and the # key to Page Down.
4. Press the Edit soft key and scroll down to the Auto Reject field.
5. Use the and to select Enabled.
6. Press the Save or Cancel soft keys to accept or cancel changes.
7. Press or the Exit soft key repeatedly to return to the idle display.

Diverting Calls

You can customize your phone so that incoming calls from a particular party are transferred directly to a third party.

To divert incoming calls from a particular contact:

1. Press .
2. Select Contact Directory.
3. Use ▲ and ▼ to scroll through the list to find the contact. You can also use the * key to Page Up and the # key to Page Down.

4. Press the **Edit** soft key and scroll down to the **Divert Contact** field.

5. Enter the number of the party to whom you want to divert the call.

6. Scroll down to the **Auto Divert** field.

7. Use the ▼ and ▲ to select **Enabled**.

8. Press the **Save** or **Cancel** soft keys to accept or cancel changes.

9. Press **Directory** or the **Exit** soft key repeatedly to return to the idle display.

**System Customizations**

The following section details customizations of your SoundPoint IP 650 SIP phone that are performed by your system administrator.

**Supporting Multiple Lines**

Your SoundPoint IP 650 SIP phone can support up to 34 lines with or without a SoundPoint IP Expansion Module. For more information, refer to Using the SoundPoint IP Expansion Module on page 5-1.

Typically, the top-most Line Key is reserved for the principal directory number (DN) of the phone.
Depending on how your phone is configured, the display could resemble one of the following figures:

**Supporting Multiple Line Keys Per Line**

Each line on the phone can be configured to have more than one Line Key associated with it. This enhances call visualization and simplifies call handling. If this is the case, the display could resemble the following figure:

Incoming calls to this line will be distributed evenly among the available Line Keys. Similarly, outgoing calls will be distributed.

Your phone can be configured to have a combination of lines with a single Line Key and lines with multiple Line Keys.
Supporting Shared Lines

Your SoundPoint IP 650 SIP supports shared lines. A shared line is indicated by a different line icon. In the following figure, the line 6721 is private and the line 6723 is shared.

If two phones share a line, an incoming call to that number will cause both phones to ring. The call can be answered on either phone but not both.

Calls on shared lines can be transferred, put on hold, or added to a conference.

**Note**  
Shared lines are an optional feature and may not be supported on your particular system. For more information, contact your system administrator.

**Note**  
Call Forwarding is not available on shared lines.  
Do Not Disturb (DND) on shared lines disables the ringing option only, the visual indication is still in place.
Using the Basic Features of Your SoundPoint IP 650 SIP Phone

Your SoundPoint IP 650 SIP phone is designed to be used like a regular phone on a public switched telephone network (PSTN). You call place calls, transfer a call to someone else, or conduct a conference call.

At any time, at most one active call may be in progress on your phone. The active call is the one that has audio associated with it. There may be multiple other calls:

- On hold
- In an “Incoming call” or “Ringing” state

This chapter provides basic operating instructions for the SoundPoint IP 650 SIP phone. This chapter contains instructions on:

- Placing a Call
- Answering a Call
- Ending a Call
- Redialing a Number
- Putting a Call on Hold
- Setting Up a Conference
- Transferring a Call
- Forwarding Calls
- Enabling Do Not Disturb
- Assigning Speed Dial Keys
- Using Voice Mail
To customize your phone, refer to Customizing Your SoundPoint IP 650 SIP Phone on page 2-1. To read about the phone’s advanced features, refer to Using the Advanced Features of Your SoundPoint IP 650 SIP Phone on page 4-1. To add a SoundPoint IP Expansion Module to your SoundPoint IP 650 phone, refer to Using the SoundPoint IP Expansion Module on page 5-1.

If you require additional information or assistance with your new phone, contact your system administrator.

Placing a Call

You can place a call in many ways using your SoundPoint IP 650 SIP phone:

- using the handset
- using the speakerphone
- using the headset

You can also dial the number first, and then choose the method you will use to speak to the other party.

During a call, you can alternate between Handset, Headset, or Hands-Free Speakerphone modes by pressing the or keys, or picking up the handset.

Call duration on an active call is monitored through a local call timer. This is visible within the active call window on the graphic display. In the figure below, the call to Greg Slowski has lasted 34 seconds so far.
To place a call using the handset:

1. Do the following steps in any order:
   - Pick up the handset.
   - Dial the desired number using the dial pad.

To place a call using Hands-Free Speakerphone mode:

1. Do one of the following steps:
   a. With the handset on-hook, press or the NewCall soft key to obtain dial tone.
      Dial the desired number using the dial pad.
   b. With the handset on-hook, dial the desired number using the dial pad.
      Press or the Dial soft key.

To place a call using the headset:

1. Do one of the following steps:
   a. With the optional headset connected, press or the NewCall soft key to obtain dial tone.
      Press .
      Dial the desired number using the dial pad.

Note:
You can also dial using the SIP URL or IP address. To obtain the IP address of your phone, press followed by followed by Status > Platform > Phone. The IP address is listed together with other phone information. For example, 10.3.0.42, sip: jane@polycom.com. Press the Name soft key and enter the URL or IP address. Use * for "." and # for "@". Then press the Send soft key to complete the call. Support for SIP URL or IP address calling may be disabled. Contact your system administrator.
b With the optional headset connected, dial the desired number using the dial pad.

Press ①.

**Note** To permanently enable your headset, refer to Headset Memory Mode on page 2-6.

---

**Answering a Call**

When you are not in another call, you can answer a call in three basic ways using your SoundPoint IP 650 phone:

- using the handset
- using the speakerphone
- using the headset

The steps for answering an incoming call when you are in another call are different if your phone is configured for:

- A single Line Key per line

![New Call](image1)

- Multiple Line Keys per line

![New Call](image2)

If your phone is configured with multiple call appearances, refer to Using Multiple Call Appearances on page 4-1 for instructions on how to answer a call.
**Answering When Not in Another Call**

In all cases, the active call will appear on the graphic display showing call duration and destination.

**To answer a call using the handset:**

>> Pick up the handset.

**To answer a call using Hands-Free Speakerphone mode:**

>> Do one of the following steps:

- Press .
- With the handset on-hook, press opposite the incoming call (where the line status indicator is flashing green).
- Press the Answer soft key.

**To answer a call using the headset:**

>> Press to answer the call through an optionally connected headset.

If Headset Memory Mode is activated, press or the Answer soft key.

**Answering When in Another Call**

You are busy on an active call and a second incoming call arrives on the same phone number.

- If your phone is configured for a single Line Key per line:
  - The second call may cause a call waiting tone to be played and you see the second call appearance. Caller information for the incoming call appears on the graphic display.
• If your phone is configured for multiple Line Keys per line:
  – The second call may cause a call waiting tone to be played, the second Line Key indicator to fast flash green, and an incoming call icon appears. Caller information for the second Line Key appears on the bottom line of the graphic display.

• If your phone is configured for shared lines:
  – The second call may cause a call waiting tone to be played, the second Line Key indicator to fast flash green, and an incoming call icon appears on the second Line Key.

Note
If your phone is also configured for shared lines, the Reject soft-key is replaced by a Silence soft key and there is no the Forward soft-key. Pressing the Silence soft key will stop the ringing for that call.

To answer an incoming call on a line configured for a single Line Key:

Do one of the following steps:

– Press \( \text{Hold} \) or the Hold soft key to put the original call on hold.

– Press \( \text{Forward} \) to access the new call.

Soft key labels are updated on the display showing Answer, Reject, and Forward.
Answer the incoming call.

This places the original call on hold and refreshes the soft key labels.

**Note**

Incoming calls may be forwarded by pressing the **Forward** soft key. For more information, refer to Dynamic Forwarding on page 3-16.

**To answer an incoming call on a line configured for multiple Line Keys:**

>> Do one of the following steps:

- Answer the call by pressing associated with the second incoming call.

  The first call is put on hold and the second call is answered.

- Press or the **Hold** soft key to put the original call on hold.

  Soft key labels are updated on the display showing **Answer**, **Reject**, and **Forward**.

  Answer the incoming call.

  This places the original call on hold and refreshes the soft key labels.

**Note**

Incoming calls may be forwarded by pressing the **Forward** soft key. For more information, refer to Dynamic Forwarding on page 3-16.

**To answer an incoming call on a shared line:**

1. Answer the incoming call.

2. Press or the **Hold** soft key.

   Anyone on another phone configured to use the same shared line may take the call by selecting the Line Key associated with the on hold call (represented by a flashing red LED).
Ending a Call

To end a call:

>> Do one of the following steps:
   – Press the EndCall soft key.
   – Replace the handset.
   – Press if in Hands-free Speakerphone Mode, or  if in Headset Mode.

Redialing a Number

To redial the last call placed from your phone:

>> Press .
   A call to your last placed call is attempted.

To redial a previously placed call:

1. Do one of the following steps:
   – Press from the idle display to access the Placed Calls list, scroll through the list to find the specific call.
Using the Basic Features of Your SoundPoint IP 650 SIP Phone

Using the Basic Features of Your SoundPoint IP 650 SIP Phone

2. Press the Dial soft key.

Note: These steps also apply to the Missed Call and Received Call lists.

Putting a Call on Hold

During a call, press Hold or the Hold soft key. This will be indicated on the graphic display by the hold icon as the line indicator.

Press Hold again or the Resume soft key to retrieve the call. The registered line icon appears as the line indicator.

Note: As using the Hold feature typically generates music or a beeping tone, avoid putting a conference call on hold.
Multiple Calls on Hold

If multiple calls are on hold on a single Line Key, use the ▲ and ▼ to switch between the calls, then press the Resume soft key to retrieve the desired call.

If more than two calls are on hold on a single Line Key, an indication appears on the graphic display, for example “2/3”, indicating that this is the second call out of three calls.

If calls are on hold on more than one Line Key, the details of the calls on any Line Key can be viewed by pressing that Line Key and holding it down for a more than two seconds. If a Line Key is depressed for less than a second, the first call on hold on that Line Key will be retrieved.

Setting Up a Conference

You can create a conference with other parties using the phone’s local conference feature. A conference may be created at any time between an active call and a call on hold (on the same or another line) by pressing the More and Join soft keys.

To set up a conference:

1. Call the first party.

Note: You can either dial the phone number directly or search for the number in the Contact Directory or Call Lists. For more information, refer to Placing a Call on page 3-2, Searching For a Contact on page 2-14, or Managing Call Lists on page 2-9.
2. Press the **Conference** or the **Conf** soft key to create a new call. The active call is placed on hold.

3. Call the second party.

4. When the second party answers, press the **Conference** or the **Conf** soft key again to join all parties in the conference.

**To split a conference call:**

>> Press the **Split** soft key to split the conference. Both parties will be on hold.

**To end a conference call:**

>> Press the **EndCall** soft key or hang up. The other parties will continue to be connected.
Transferring a Call

A call can be transferred in one of three ways:

- Consultative transfer—The party to whom you want to transfer the call answers their phone before you transfer the call or hang up. You can consult with them before completing the transfer.
  - To transfer a call: on page 3-12.

- Blind transfer—The call is automatically transferred after you dial the number of the party to whom you want to transfer the call.
  - To perform a blind transfer: on page 3-13.

- Attended transfer—The parties are automatically connected to each other after you exit the conference.
  - Set up a conference call and then end your participation. For more information, refer to Setting Up a Conference on page 3-10.

To transfer a call:

1. During a call, press Transfer or the Transfer soft key.
   The active call is placed on hold.

2. Do one of the following steps:
   - Enter the number to which you want to transfer the call.
   - Press Directories, select Contact Directory, use ▲ and ▼ to access the number, and then press the Dial soft key.
   - Press Directories, select Call Lists, select the appropriate list, use ▲ and ▼ to access the number, and then select the Dial soft key.
   - Press , , or ▼ to access the desired call list, use ▲ and ▼ to access the number, and then select the Dial soft key.
Using the Basic Features of Your SoundPoint IP 650 SIP Phone

3. As soon as the ring-back sound is heard or after the party answers, press the Transfer soft key to complete the transfer.

You can talk privately to the party to which you are transferring the call before the transfer is completed.

If you are using a handset, the transfer can be completed by putting the handset on the cradle.

You can cancel the transfer before the call connects by pressing the Cancel soft key.

To perform a blind transfer:

1. During a call, press the Transfer soft key.
2. Press the Blind soft key.
3. Do one of the following steps:
   - Enter the number to which you want to transfer the call.
   - Press the Directories soft key, select Contact Directory, use and to access the number, and then select the Dial soft key.
Press , select Call Lists, select the appropriate list, use 
 and  to access the number, and then select the Dial soft key.

At this point, the call is connected to the number to which you are
transferring them.

Forwarding Calls

You can configure your phone so that all incoming calls are forwarded to
another party (known as static forwarding). You can also forward calls while
the phone is ringing (known as dynamic forwarding).

All incoming calls can be forwarded to another party while Do Not Disturb is
enabled on your phone. For more information, contact your system
administrator.

Note

Call Forwarding is not available on shared lines.
This feature is local to the phone, and may be overridden by call server settings.
For more information, contact your system administrator.

Static Forwarding

To enable call forwarding to another party:

1. Do one of the following steps:

   - Press Menu and select Features > Forward...

   - Press the Forward soft key from the idle display.

2. (Optional) If multiple lines are configured on your phone, select the line
to forward from the list using  and  .
3. Using Up ▲ and Down ▼, select the forwarding type you want to change and then press the Select soft key. The options are:
   - **Always** – For all incoming calls
   - **No Answer** – Once all options to accept calls have been taken
   - **Busy** – When you are already in a call

4. Depending on your selection:
   a. If you select **Always**, enter a number to forward all future incoming calls to.

   ![Call Forward Always (1/Ascii)](image)

   Contact:

   Enable    Exit    1/A/a

   b. If you select **No Answer**, enter a number to forward all unanswered incoming calls to and how many rings to wait before forwarding (one ring is approximately six seconds). A value of 2 is recommended.

   ![Call Forward No Answer (1/Ascii)](image)

   Contact:
   Forward After Rings: 2

   Enable    Exit    1/A/a

   c. If you select **Busy**, enter a number to forward all future incoming calls to when you are already in another call.

   ![Call Forward Busy (1/Ascii)](image)

   Contact:

   Enable    Exit    1/A/a
5. Select the **Enable** soft key to confirm call forwarding.
   Select the **Exit** soft key to cancel any changes.
   The idle display returns with a moving arrow as the line label to confirm call forwarding is enabled.

**To disable call forwarding:**

1. Do one of the following steps:
   - Press **Menu** and select **Features > Forward...**
   - Press the **Forward** soft key from the idle display.
2. (Optional) If multiple lines are configured on your phone, select the line to forward from the list using **△** and **▽**.
3. Using **△** and **▽**, select the forwarding type you want to change and then press the **Select** soft key.
4. Press the **Disable** soft key to turn off call forwarding.
   The idle display returns and the regular icon appears as the line indicator.

**Dynamic Forwarding**

**To forward an incoming call to another party:**

1. With the phone ringing, press the **Forward** soft key.
2. Enter a number to forward the incoming call to.
3. Press the **Enable** soft key.
   The incoming call is forwarded to the other party. If call forwarding is disabled, all future calls will not be forwarded and forwarding will remain disabled.

---

**Note**
You can also enter the SIP URL or IP address. For more information on using a SIP URL or IP address, refer to To place a call using the handset: on page 3-3
Enabling Do Not Disturb

Press **Do Not Disturb** to prevent the phone from ringing on incoming calls. A flashing icon and text on the graphic display indicates that Do Not Disturb is on.

Calls received while Do Not Disturb is enabled are logged in the Missed Calls list unless configured to be forwarded to another party by your system administrator.

To disable Do Not Disable, press **Do Not Disturb** again.

**Note**
This feature is local to the phone, and may be overridden by call server settings. For more information, contact your system administrator.

Multiple Lines and Do Not Disturb

If multiple lines are configured on your phone, Do Not Disturb can be set on a line-by-line basis from the list using \( \triangle \) and \( \vee \). For more information, contact your system administrator. When Do Not Disturb is enabled for a particular line, this is indicated by a flashing “X” beside the line indicator on the display.

Assigning Speed Dial Keys

You can associate contacts with Line Keys for single touch dialing of frequently used numbers. Speed Dial entries are consecutively placed next to assigned Line Keys on the phone. When a new entry is added to the Contact Directory, it is automatically assigned the next available speed dial index.
For example in the figure below, press the fourth Line Key to dial the shipping department.

![Phone Display](image)

**Note**
Press the Up arrow key from the idle display to access the Speed Dial Index list directly. This shortcut can be used while performing transferring and conferencing functions.

**Assigning New Speed Dial Keys**

**To add or edit a speed dial index for an existing contact:**

1. Press **Directories**.
2. Select **Contact Directory**.
3. Use **△** and **▼** to scroll through the list to find the contact.
   - You can also use the * key to Page Up and the # key to Page Down.
4. Do one of the following steps:
   - Enter the next available speed dial index.
   - Delete the existing speed dial index by using **Play** followed by **Clear**, and then enter a new speed dial index.
   - Press and hold an unassigned Line Key.

   The next available speed dial index will be assigned automatically.
5. Press the **Save** or **Cancel** soft keys to accept or cancel changes.

6. Press **Directories** or the **Exit** soft key repeatedly to return to the idle display.

**To assign a new speed dial key:**

1. Press and hold an unassigned key.

   A new empty entry in the contact directory is automatically opened allowing contact information to be added.

2. Press the **More** soft key.

3. Press the **Add** soft key.

4. Enter first and/or last name of the contact from the keypad.

   Use the **1/A/a** soft key to select between numeric and upper/lower case alphanumeric modes.

   Use the **Encoding** soft key to access special characters in other languages.

5. Enter a contact number.

   This is a required field and it must be unique (not already in the directory).

6. Change the **Speed Dial Index**.

   The index can be any value between the next available index value and the maximum (9999).

   Polycom recommends that you assign speed dial index values consecutively. For example, if the third Line Key is assigned to the speed dial index value “2”, assign the fourth Line Key the speed dial index value “3”.

7. Press the **Save** or **Cancel** soft keys to accept or cancel changes.

8. Press **Directories** or the **Exit** soft key repeatedly to return to the idle display.

**Using Voice Mail**

Your voice mail is saved in a centralized location and may be accessed from your phone.

The presence of new Voice Mail messages is indicated by a flashing Message Waiting Indicator LED on the front of the phone and a visual notification on the graphic display. If the phone is configured for multiple lines, an individual line indicator icon indicates Voice Mail messages left on that line.
A stutter dial tone in place of normal dial tone is used to indicate that one or more voice messages are waiting at the message center.

**Note**

Voice Mail is an optional feature configured on the call server and may not be supported on your particular system. For more information, contact your system administrator.

Screen options may vary with your application. Voice Mail may be accessible with a single key press. Contact your system administrator about this option.

**To listen to voice messages:**

1. Press "Messages".
2. Follow voice or visual prompts on the graphic display to retrieve your messages.
   
   If multiple lines are configured on your phone, select from which line messages are to be retrieved.
Using Multiple Call Appearances

Each line on the phone can be configured to have one or more call appearances. More than one call appearances is useful if there is an active call and an incoming call arrives on the same line.
For example, the first figure shows extension 6721 in an outbound call with 6722.

The second figure shows an incoming call from 1-800-765-9266.

To answer an incoming call when configured for multiple call appearances:

>> Do one of the following steps:

- Press \( \text{Hold} \) or the \text{Hold} soft key to put the original call on hold.
- Press \( \text{Forward} \) to access the new call.

Soft key labels are updated on the display with \text{Answer}, \text{Reject}, and \text{Forward}.

Answer the incoming call.
Using the Advanced Features of Your SoundPoint IP 650 SIP Phone

This places the original call on hold and refreshes the soft key labels as indicated in the following figure.

![Call Appearance Display](image)

If more than two call appearances are in use, two will appear on the display and the total number will be indicated by a counter at the bottom right corner of the display. For example “2/3” indicates that the highlighted call is the second one out of a total of three.

You can also place another outbound call on the same first line. Press during the first call and press the NewCall soft key to obtain dial tone for a second call.

Using Text Messaging

You can send and receive text messages using your phone. SIP Instant (Text) Messaging is supported in real-time. Received messages will be indicated by a flashing Message Waiting Indicator LED on the front of the phone and optionally a visual notification on the graphic display.

To read text messages:

1. Do one of the following steps:

   - Press .

   Select Instant Messages.

   **Note** Screen options may vary with your application. Voice Mail may be accessible with a single key press. Contact your system administrator about this option.
— Press [Menu].

Select Features > Messages > Instant Messages.
— Press the InstMsg soft key to read a message just received.

2. (Optional) If multiple lines are configured on your phone, select from which line messages are to be retrieved from the list using ▲ and ▼.

Messages appear first to last in sent order.

3. Press the Next or Prev soft keys to cycle through messages in order.

4. Press the More soft key to access the Delete, Reply, and New soft keys.

5. Press Messages or the Exit soft key repeatedly to return to the idle display.

**To send a text message:**

1. Do one of the following steps:
   — Press [Messages].

   Select Instant Messages.

   **Note** Screen options may vary with your application. Voice Mail may be accessible with a single key press. Contact your system administrator about this option.

   — Press [Menu].

   Select Features > Messages > Instant Messages.

2. (Optional) If multiple lines are configured on your phone, first select from which line to send the message from the list using ▲ and ▼.

3. Press the New soft key.

4. Enter the desired number.

   Use the 1/A/a soft key to alternate between numeric and upper/lower case alphanumeric modes.

   **Note** You can also enter the SIP URL or IP address. For more information on dialing with SIP URL or IP address, refer to To place a call using the handset:: on page 3-3.
5. Press the Ok soft key.

6. Do one of the following steps:
   - Press the Select soft key to choose from various pre-scripted short messages.
   - Press the Edit soft key to compose a custom message.
     Use dial pad keys to cycle through the character set. Use keys 1, *, 0, and # to select special characters.

7. Press the Send soft key when finished.

8. Press Messages or the Exit soft key repeatedly to return to the idle display.

Using Buddy Lists

Your SoundPoint IP 650 phone combines interactive message services and status monitoring to complement a traditional messaging application such as e-mail.

Live interaction within a pool of phones is possible by monitoring the “presence” of the parties involved. Your phone can “watch” the status of up to 8 other phones or 48 buddies. These other phones form your “buddy list”. The status of your buddies is displayed and updated in real time. Your phone can be “watched” by up to 8 other phones.

If your SoundPoint IP 650 SIP phone is configured to work with Microsoft Live Communications Server 2005, the behavior of the presence setting and buddy lists is different. For more information, contact your system administrator.

Presence

To view and change your presence settings:

1. Do one of the following steps:
   a. Press Menu.
      Select Features > Presence.
      Select My Status.
b  Press the MyStat soft key.

2. Use ▲ or ▼ to scroll through the list, and then press the Select soft key to select your new status.
   This affects information sent to phones watching you.
   Presence information will also be sent to watching phones when you go off-hook or enable Do Not Disturb.

Managing Buddies

Note
The instructions in this section do not apply if your call server is Microsoft Live Communications Server 2005. In that case, refer to the following section, Integrating With Microsoft Live Communications Server 2005.

To add or delete a contact from your buddy list:

1. Press Directories .
2. Select Contact Directory.
3. Use ▲ and ▼ to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
4. Press the Edit soft key and scroll down to the Watch Buddy fields.
5. Use ▲ and ▼ to select Enabled.
   When Watch Buddy is enabled, the contact is added to your buddy list.
   When Watch Buddy is disabled, the contact is removed from your buddy list.
   The default for Watch Buddy is Disabled.
6. Press the Save or Cancel soft keys to accept or cancel changes.
7. Press Directories or the Exit soft key repeatedly to return to the idle display.
To block or unblock a contact from your buddy list:

1. Press \Directories .
2. Select Contact Directory.
3. Use \ and \ to scroll through the list to find the contact.
   You can also use the * key to Page Up and the # key to Page Down.
4. Press the Edit soft key and scroll down to the Block Buddy fields.
5. Use \ and \ to select Enabled.
   When Block Buddy is enabled, the contact cannot watch your phone. When
   Block Buddy is disabled, the contact can watch your phone.
   The default for Block Buddy is Disabled.
6. Press the Save or Cancel soft keys to accept or cancel changes.
7. Press \ or the Exit soft key repeatedly to return to the idle display.

Integrating With Microsoft Live Communications Server 2005

Your phone can be configured to work with Microsoft Live Communications
Server 2005 and communicate with others using Microsoft Office
Communicator and Windows Messenger. From your phone, you can invite,
join, control, and monitor integrated multipoint audio and video conferences.

Any contacts added through your buddy list will appear as a contact in
Microsoft Office Communicator and Windows Messenger. Any contacts
added as a contact in Microsoft Office Communicator and Windows
Messenger will appear in your buddy list.

To view and change your presence, refer to To view and change your presence
settings: on page 4-5.

For more information, contact your system administrator.

To add a contact to your buddy list:

1. Press \Menu , then select Features > Presence > Buddy Status.
2. Press the More soft key.
3. Press the Add soft key.
4. Enter the number of the contact.
5. Press the Submit soft key.
6. Press the Exit soft key repeatedly to return to the idle display.
To view and change your privacy list:

1. Press \[\text{Menu}\] .
2. Select \textit{Features} > \textit{Presence} > \textit{Buddy Status} > \textit{Privacy List}.
3. Use \langle\rangle and \langle\rangle to scroll through the list to find the contact.
4. Press the \textit{Edit} soft key.
5. For \textit{Access}, use \langle\rangle and \langle\rangle to select Enabled.
   When \textit{Access} is enabled, you are allowing the contact to see your presence. When \textit{Access} is disabled, you are disallowing the contact from seeing your presence.
   The default for access is Disabled.
6. Press \[\text{Menu}\] or the \textit{Exit} soft key repeatedly to return to the idle display.

   For more information on contacting buddies, refer to \textbf{Placing a Call} on page 3-2 or the Microsoft Office Communicator and Windows Messenger documentation.

### Restarting Your Phone

Periodically, you may need to restart your phone. The reasons for this include:

- Accepting a new configuration
- Accepting new software

\begin{itemize}
  \item \textbf{Note} In the case of problems, it may be possible to restore normal operation of your phone without restarting. Contact your system administrator before attempting to restart your phone.
  \item \textbf{Note} The call lists are automatically cleared when you restart the phone.
\end{itemize}
To restart the phone:

Do one of the following steps:

- Simultaneously press and hold the Messages, , , and for more than 3 seconds or until a beep is heard.

- Press the Menu key, then select Settings > Advanced > Restart Phone.

You must enter your password to access this menu.

The restart process will begin and is complete when the idle display is shown.
Using the SoundPoint IP Expansion Module

This chapter provides basic installation and operating instructions and information for obtaining the best performance with the SoundPoint IP Expansion Module.

The SoundPoint IP Expansion Module enhances the user interface of the SoundPoint IP 650 phone with a high-resolution graphic display and 14 Line Keys that can be automatically configured as a line, call appearance, speed dial, or busy lamp field. Up to three SoundPoint IP Expansion Modules can be connected to the SoundPoint IP 650 phone to provide a productivity-enhancing solution for users who manage and monitor multiple simultaneous telephone calls on a daily basis.

This chapter contains:

- Parts List
- Connecting the SoundPoint IP Expansion Module
- Features of the SoundPoint IP Expansion Module

This chapter contains instructions on:

- Adjusting the Display Contrast
- Placing a Call
- Answering a Call
- Assigning Speed Dial Keys
- Using the Busy Lamp Field

To customize your phone, refer to Customizing Your SoundPoint IP 650 SIP Phone on page 2-1. To read about the phone’s basic features, refer to Using the Basic Features of Your SoundPoint IP 650 SIP Phone on page 3-1. To read about the phone’s advanced features, refer to Using the Advanced Features of Your SoundPoint IP 650 SIP Phone on page 4-1.

If you require additional information or assistance with the Expansion Module, contact your system administrator.
Parts List

The following components are included in your SoundPoint IP Expansion Module package:

- Polycom SoundPoint IP Expansion Module

- Base stand

Check this list before installation to ensure that you have received each item. If you are missing any items, contact your system administrator.

Connecting the SoundPoint IP Expansion Module

This section describes how to attach the SoundPoint IP Expansion Module to your SoundPoint IP 650 phone. You can attach up to three SoundPoint IP Expansion Modules.
To connect a SoundPoint IP Expansion Module to your phone:

1. Remove the rubber plug from the SoundPoint IP 650 or the SoundPoint IP Expansion Module.

2. Align the SoundPoint IP Expansion Module at the top of the groove lines on the SoundPoint IP 650 phone and slide it downwards until it clicks into position.

3. Connect the base stand by aligning the two protrusions on the stand to the holes on the back of the Expansion Module and snap it into place.

For each SoundPoint IP Expansion Module that you want to add, repeat steps 1 to 3.
Features of the SoundPoint IP Expansion Module

The features of the SoundPoint IP Expansion Module are:

1. **Line/Speed Dial Key** — Use these keys to activate up to 47 lines or speed dials that can be assigned to your phone.

2. **Infrared Lens** — Communications to the host phone and other Expansion Modules.

3. **Line Indicators** — Individual multi-color LEDs display the dynamic call state and remote user status (busy lamp field (BLF) and presence). The mapping is:
   - Solid green — An active call is in progress.
   - Fast flashing green — There is an Incoming (ringing) call.
   - Flashing green — The call is held by the other party.
   - Flashing red — The call is on hold.
   - Solid red — The line is busy remotely (shared lines).

4. **Graphic Display** — Shows information about lines or speed dials.

5. **Power Contact** — Not visible when connected. Power is automatically transferred from the host SoundPoint IP 650 phone to the SoundPoint IP Expansion Module(s) upon connection. Units may be plugged in and unplugged at any time.
Adjusting the Display Contrast

You can adjust the display contrast on a SoundPoint IP Expansion Module through use of the key on the SoundPoint IP 650.

To adjust the contrast on the display to a comfortable level:

1. Press .
2. Select Settings > Basic > Contrast.
   The display on the SoundPoint IP Expansion Module changes, presenting a new display along with Line Keys that are assigned Up or Down status.
   For more information, refer to Display Contrast on page 2-3.
3. Press the Up or Down soft keys to increase or decrease the display contrast.
4. Press the Ok or Cancel soft keys to accept or cancel changes.
5. Press or the Exit soft key repeatedly to return to the idle display.

Placing a Call

When a SoundPoint IP Expansion Module is connected to your SoundPoint IP 650 phone, you can place a call using one of the Line Keys.

To place a call using a SoundPoint IP Expansion Module Line Key:

Press the assigned directly opposite the number on the graphic display.

For more information on placing a call, refer to Placing a Call on page 3-2.
Answering a Call

When a SoundPoint IP Expansion Module is connected to your SoundPoint IP 650 phone, you can answer a call using one of the Line Keys.

To answer a call using a SoundPoint IP Expansion Module Line Key:

Press the assigned directly opposite the line with the fast flashing green LED indicator.

For more information on answering a call, refer to Answering a Call on page 3-4.

Assigning Speed Dial Keys

You can associate contacts with Line Keys on the SoundPoint IP Expansion Module for single touch dialing of frequently used numbers. Speed Dial entries are consecutively placed next to assigned Line Keys.

For example in the figure below, press the fourth Line Key to dial home.

To assign a new speed dial key:

1. Press and hold an unassigned.
2. Press the More soft key.
3. Press the **Add** soft key.

4. Enter first and/or last name of the contact from the keypad.
   Use the **1/A/a** soft key to select between numeric and upper/lower case alphanumeric modes.
   Use the **Encoding** soft key to access special characters in other languages.

5. Enter a contact number.
   This is a required field and it must be unique (not already in the directory).

6. Change the **Speed Dial Index**.
   The index can be any value between the next available index value and the maximum (9999).

7. Press the **Save** or **Cancel** soft keys to accept or cancel changes.

8. Press **Directories** or the **Exit** soft key repeatedly to return to the idle display.

For more information on assigning speed dial keys, refer to **Assigning Speed Dial Keys** on page 3-17.

### Using the Busy Lamp Field

The busy lamp field (BLF) feature allows you to monitor the hook status and remote party information of other users through the BLF LED indicators and display on the SoundPoint IP 650 phone with the attached Expansion Module. For more information, contact your system administrator.
The following figure shows the busy status of other users (for example, Jim Brown and Rob Smith are busy on the phone):
Troubleshooting Your
SoundPoint IP 650 SIP Phone

This chapter presents problems, likely causes, and corrective actions. Problems are grouped as follows:

• Power and Startup
• Controls
• Access to Screens and Systems
• Calling
• Displays
• Audio

If you still need assistance, contact your system administrator.
## Power and Startup

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>There are power issues.</td>
<td>The SoundPoint IP 650 phone has no power.</td>
<td>Do one of the following steps:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Verify that no lights appear on the unit when it is powered up.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Check if the phone is properly plugged into a functional AC outlet.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Make sure that the phone isn't plugged into a plug controlled by a light switch that is off.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• If plugged into a power strip, try plugging directly into a wall outlet instead.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Try the phone in another room where the electricity is known to be working on a particular outlet.</td>
</tr>
</tbody>
</table>
## Controls

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>The dial pad does not work.</td>
<td>The dial pad on the SoundPoint IP 650 phone does not respond.</td>
<td>Do one of the following steps:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Check for a response from other feature keys or from the dialpad.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Place a call to the phone from a known working telephone. Check for display updates.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Press the Menu key followed by System Status and Server Status to check if the telephone is registered correctly to the server.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Press the Menu key followed by System Status and Network Statistics. Scroll down to see if LAN port shows active or Inactive.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Check the termination at the switch or hub end of the network LAN cable. Ensure that the switch/hub port connected to the telephone is operational (if not accessible, contact your system administrator).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Before restarting your phone, contact your system administrator, since this may allow more detailed troubleshooting to occur before losing any current status information.</td>
</tr>
</tbody>
</table>
## Access to Screens and Systems

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is no response from feature key presses.</td>
<td>The SoundPoint IP 650 phone is not in active state.</td>
<td>Do one of the following steps:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Press the keys more slowly.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Check with the system administrator to see whether or not the key has been mapped to a different function or disabled.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Make a call to the phone to check for inbound call display and ringing as normal. If successful, try to press feature keys within the call to access the Menu, for example.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Press Menu followed by Status &gt; Lines to confirm line is actively to the call server.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Reboot the phone to attempt re-registration to the call server (refer to Restarting Your Phone on page 4-8).</td>
</tr>
<tr>
<td>The display shows “Network Link is Down”.</td>
<td>The LAN cable is not properly connected.</td>
<td>Do one of the following steps:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Check termination at the switch or hub (furthest end of the cable from the phone).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Check that the switch or hub is operational (flashing link/status lights) or contact your system administrator.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Press Menu followed by Status &gt; Network. Scroll down to verify that the LAN is active.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Reboot the phone to attempt re-registration to the call server (refer to Restarting Your Phone on page 4-8).</td>
</tr>

| There is no dial tone.                       | Power is not correctly applied to the SoundPoint IP 650 phone. | Do one of the following steps:  
  - Check that the display is illuminated.  
  - Make sure the LAN cable is inserted properly at the rear of the phone (try unplugging and re-inserting the cable).  
  - If using PoE, have your system administrator check that the switch is supplying power to the phone. |
| Dial tone is not present on one of audio paths. | Do one of the following steps:  
  - Switch between Handset, Headset (if present) or Hands-Free Speakerphone to see if dial tone is present on other paths.  
  - If dial tone exists on another path, connect a different handset or headset to isolate the problem. |

## Displays

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem</th>
<th>Corrective Action</th>
</tr>
</thead>
</table>
| There is no display. The display is incorrect. The display has bad contrast. | Power is not correctly applied to the SoundPoint IP 650 phone. | Do one of the following steps:  
  - Check that the display is illuminated.  
  - Make sure the LAN cable is inserted properly at the side of the phone (try unplugging and re-inserting the cable).  
  - If using in-line powering, have your system administrator check that the switch is supplying power to the phone. |
| The contrast needs adjustment. | Do one of the following steps:  
  - Refer to [Display Contrast](#) on page 2-3.  
  - Reboot the phone to obtain a default level of contrast (refer to [Restarting Your Phone](#) on page 4-8). |
| Outbound or inbound calling is unsuccessful. | Do one of the following steps:  
  - Place a call to the phone under investigation. Check that the display indicates incoming call information.  
  - Lift the handset. Ensure dial tone is present and place a call to another extension or number. Check that the display changes in response. |
| The display is flickering. | Certain type of older fluorescent lighting causes the display to appear to flicker. | Do one of the following steps:  
  - Move the SoundPoint IP 650 SIP phone away from the lights.  
  - Replace the lights. |

## Audio

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem</th>
<th>Corrective Action</th>

</thead>
</table>
| There is no audio on the headset. | The connections are not correct. | Do one of the following steps:  
  - Ensure the headset is plugged into the jack marked Headset at the rear of the phone.  
  - Ensure the headset amplifier (if present) is turned on and/or the volume is correctly adjusted. |
# Regulatory Notices

## Service Agreements

Please contact your Polycom Authorized Reseller for information about service agreements applicable to your product.

## Governing Law

This Limited Warranty and Limitation of Liability shall be governed by the laws of the State of California, U.S.A., and by the laws of the United States, excluding their conflicts of laws principles. The United Nations Convention on Contracts for the International Sale of Goods is hereby excluded in its entirety from application to this Limited Warranty and Limitation of Liability.

All rights reserved under International and Pan-American Copyright Conventions. No part of the contents of this manual may be copied, reproduced, or transmitted in any form or by any means, or translated into another language or format, in whole or part, without written consent from Polycom, Inc. Do not remove (or allow anybody else to remove) any product identification, copyright or other notices.

## Limitations of Liability

LIMITATION OF LIABILITY. TO THE FULL EXTENT ALLOWED BY LAW, POLYCOM EXCLUDES FOR ITSELF AND ITS SUPPLIERS ANY LIABILITY, WHETHER BASED IN CONTRACT OR TORT (INCLUDING NEGLIGENCE), FOR INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND, OR FOR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE, USE, PERFORMANCE, FAILURE, OR INTERRUPTION OF ITS PRODUCTS, EVEN IF POLYCOM OR ITS AUTHORIZED RESELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND LIMITS ITS LIABILITY TO REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT POLYCOM’S OPTION. THIS DISCLAIMER OF LIABILITY FOR DAMAGES WILL NOT BE AFFECTED IF ANY REMEDY PROVIDED HEREIN SHALL FAIL OF ITS ESSENTIAL PURPOSE.
Polycom Limited Warranty and Limitation Liability

LIMITED WARRANTY. Polycom warrants to the end user (“Customer”) that this product is expected to be free from defects in workmanship and materials, under normal use and service, for one year from the date of purchase from Polycom or its authorized reseller.

Polycom’s sole obligation under this express warranty is at Polycom’s option and expense, to repair the defective product or part, deliver to Customer an equivalent product or part to replace the defective item, or if neither of the two foregoing options are reasonably available, Polycom may, on its sole discretion, refund to Customer the purchase price paid for the defective product. All products that are replaced will become the property of Polycom. Replacement products or parts may be new or reconditioned.

Polycom is expected to warrant any replaced or repaired product or part for ninety (90) days from shipment, or the remainder of the initial warranty period, whichever is longer. Products returned to Polycom must be sent prepaid and packaged appropriately for safe shipment, and it is recommended that they be insured or sent by a method that provides for tracking of the package. Responsibility for loss or damage does not transfer to Polycom until the returned item is received by Polycom. The repaired or replaced item will be shipped to Customer, at Polycom’s expense, not later than thirty (30) days after Polycom receives the defective product, and Polycom will retain risk of loss or damage until the item is delivered to Customer.

The product software comes with 90-day software warranty, providing for software updates (minor releases/bug fixes). To continue to receive support, purchasing a maintenance contract is the most economical solution.

Exclusions

Polycom will not be liable under this limited warranty if its testing and examination disclose that the alleged defect or malfunction in the product does not exist or results from:

• Failure to follow Polycom’s installation, operation, or maintenance instructions.
• Unauthorized product modification or alteration.
• Unauthorized use of common carrier communication services accessed through the product.
• Abuse, misuse, negligent acts or omissions of Customer and persons under Customer’s control; or
• Acts of third parties, acts of God, accident, fire, lightening, power surges or outages, or other hazards.

Warranty Exclusive

IF A POLYCOM PRODUCT DOES NOT OPERATE AS WARRANTED ABOVE, CUSTOMER’S SOLE REMEDY FOR BREACH OF THAT WARRANTY SHALL BE REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT POLYCOM’S OPTION. TO THE FULL EXTENT ALLOWED BY LAW, THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE AND ARE IN LIEU OF ALL OTHER WARRANTIES, TERMS, OR CONDITIONS, EXPRESS OR IMPLIED, EITHER IN FACT OR BY OPERATION OF LAW, STATUTORY OR OTHERWISE, INCLUDING WARRANTIES, TERMS, OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, SATISFACTORY QUALITY, CORRESPONDENCE WITH DESCRIPTION, AND NON-INFRINGEMENT, ALL OF WHICH ARE EXPRESSLY DISCLAIMED. POLYCOM NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME FOR IT ANY OTHER LIABILITY IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE OR USE OF ITS PRODUCTS.
Safety and Compliance

**Part 15 FCC Rules**
This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interferences received, including interference that may cause undesired operation.

**Class B Digital Device or Peripheral**
Note: This equipment is tested and complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

**Modifications**
In accordance with Part 15 of the FCC Rules, the user is cautioned that any changes or modifications not expressly approved by Polycom, Inc. could void the user’s authority to operate the equipment. This equipment may not be used on a coin service or party line.

**Installation Instructions**
Installation must be performed in accordance with all relevant national wiring rules.

**Plugs Acts as Disconnect Device**
The socket outlet to which this apparatus is connected must be installed near the equipment and must always be readily accessible.

**Industry Canada (IC)**
This Class [B] digital apparatus complies with Canadian ICES-003.

**CE and VCCI Mark**
This SoundPoint IP 500/501 SIP is marked with the CE mark. This mark indicates compliance with EEC directories 89/336/EEC and 73/23/EEC. A full copy of the Declaration of Conformity can be obtained from Polycom Ltd., 270 Bath Road, Slough, Berkshire, SL1 4DX, UK.

この装置は、情報処理装置等電気障害自主規制協議会（VCCI）の基準に基づくクラスB情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン送信機に近接して使用されると、受信障害を引き起こすことがあります。
取扱説明書に従って正しい取り扱いをして下さい。
